

STACKABLE LOW DEPTH BOTTLE CASE
WITH INTEGRAL SIDEWALL LOGO

ABSTRACT OF THE DISCLOSURE

A stackable case for retaining and transporting bottles including outer side walls forming an outer shell having a longitudinal axis and a horizontal axis, a case bottom disposed substantially within the outer shell, and a plurality of supports for supporting the outer surfaces of the bottles. The side walls include a lower wall portion and a plurality of spaced upwardly projecting pylons, where four corner pylons define the four corners of the case. A plurality of spaced upwardly projecting columns generally disposed within the outer shell define, in combination with the case bottom, the side walls and the end walls, a plurality of bottle retaining pockets. The columns and the pylons extend above the lower wall portions and below a top surface of the retained bottles. At least one of the side walls includes an integrally molded logo which identifies the source of the goods.
